

BitStream *PRO*

Mac Configuration Software V1.0

REQUIREMENTS

Mac OS 9.x
OMS 2.3.8

SETUP INSTRUCTIONS

- 1 – Get the latest software version at <http://www.waveidea.com>, download area
- 2 – Uncompress the archive using StuffIt Expander
- 3 - Copy the MidiPort extension in the Extension folder of your System Folder
- 4 – Run BSProConfig

GETTING STARTED

- 1- Connect your BitStream PRO unit to your Mac, both MIDI IN and OUT
- 2- Set up MIDI ports
- 3- Click on a button to program and use either the templates or enter your own MIDI string
- 4- Update BitStream

(note : for further information, please refer to the PC documentation, available at http://www.waveidea.com/common/doc_soft_bspro/bitstream.htm)

FAQ

Do not hesitate to have a look at Wave Idea Forum posts about the Mac Configuration Software

KNOWN ISSUES

Incompatibility between JavaMidi and QT5

To solve this known bug, simply deactivate the QuickTime Synthesizer in the OMS Setup window

MacOS X

Since the soft uses OMS, it does not work with MacOS X.
